

## INDEPENDENT SPRING SYSTEM

Individual, electronically heat-tempered springs, give Bio X Cell all the attributes that surpass and outlast other pocket spring systems available in New Zealand. Unlike conventional spring units where springs are connected to helical wires, the springs in the Elegance pocket spring bed have complete independence from one another, giving complete freedom from partner disturbance.

## ELEGANCE SUPER PLUSH

The top Model in the Sleepyhead Commercial Range. The exclusive Bio X Cell independent spring system, extra thick layers of natural Latex Gold rubber, and the addition of a luxurious Box Top, make the Elegance Super Plush unparalleled for sleeping comfort. Featuring new super soft, stretch fabric.

Queen	152 x 202cm	King	167 x 202cm
Super King	182 x 202cm	California King	200 x 202cm

*The perfect bed for exclusive boutique accommodation, and luxury Lodges.*
