

### BIOXCELL SPRING UNIT

BioXCell offers the most advanced technology in pocket spring systems available anywhere in the world. Individual, electronically heat-tempered springs provide a longer life and added durability. Unlike conventional spring units, the BioXCell springs have complete independence from one another, giving complete freedom from partner disturbance.

### TORQUEZONE SPRING UNIT

Recognised as the world's most advanced support system, the Torquezone unit features spirals made from one continuous length of high strength, heat tempered steel wire, which dramatically increases the strength and support of the unit. The spirals are linked together with helicals that run head to toe, which helps reduce 'roll-together'.

All models feature a posturised centre, where additional springs are more closely spaced in the lumbar/hip zone, giving additional support. The Torquezone system is completely encased in the Structureflex foam box. This gives superb edge support right around the perimeter of the bed, further extending the sleeping surface, and giving the required support for getting in and out of bed.

### TRUFLEX ADVANCED SPRING UNIT

Electronically heat-tempered for added durability, the well proven Truflex spring unit is virtually indestructible and will provide years of support.

### COCONUT FIBRE INSULATING PADS

Exclusive to Sleepyhead, coconut fibre insulating pads are extremely durable and help prevent spring wear, adding years to the life of the mattress. Used on both sides of the spring unit, coconut fibre allows air and moisture to flow right through. Because coconut fibre does not absorb moisture, it will not deteriorate over time, providing you with a dry and hygienic sleep.

### NATURAL LATEX COMFORT LAYERS

Specially moulded to breathe more freely and mould to your body shape, Latex Gold supports your body uniformly, yet yields to the extra pressure and shape of your hips and shoulders, providing correct spine-in-line support. Scientifically proven to be anti-bacterial, hypo-allergenic, dust free, contaminant-free and non-toxic resulting in a total muscle relaxation of the body and a healthier sleeping surface.

### DREAMFOAM® COMFORT LAYERS

Environmentally Friendly DreamFoam® is New Zealand's first truly environmentally friendly foam manufactured using a carbon neutral process. The unique cell structure of DreamFoam® offers superior support and comfort. The DreamFoam® process produces less waste and is 100% recyclable.

### DEEP QUILTED SLEEPING SURFACE

Deep quilting through foam and extra thick layers of Nuvole–Pure Comfort fibre.

### SMOOTH-QUILTED SLEEPING SURFACE

Flatter type surface where outer covering is quilted through soft foam.

### SPECIALLY TREATED OUTER FABRIC

Sleepyhead Commercial heavy duty, hard wearing outer fabrics have been specifically treated with SlumberGuard. This treatment is not only a fire retardant, but also inhibits the growth of micro-organisms.

### ZIP-COMBINATION

Sleepyhead offer a 'zip-combination' design where two beds are joined together by a high tensile zip (making for example, an overall King, Super King or California King size) with each person having their own individual comfort zone. This also offers greater room flexibility. Bases are secured by an easy to use metal joiner system at both ends.

### EXTRA LENGTH SINGLE/DOUBLE BEDS

Conventional Single and Double bedding sizes are 190cm x 91cm and 137cm respectively all models except Hotelier and Wayfarer are 202cm long as standard. Other models in the range are 190cm long with the option of ordering them 202cm long if desired.

### FIRM EDGE DIVAN BASE

Divan base featuring a spring unit complementary to that in the mattress – effectively doubling the level of comfort and support, adding years to the life of the bed.

### ORTHOPAEDIC BASE

Deep base with solid wooden slats on top. Fully upholstered to match the mattress.

### SPLIT BASE FOR EASY MANOEUVRABILITY

All King size beds have a 'split base' combination, for easy handling/moving.

### LEGS

A choice of legs, castors and glides are available, to suit individual requirements.
